How can I get the property MPMediaItemPropertyPlaybackDuration to return the duration, i.e. time of the track, rather than the number of seconds? A: You would have to divide by 1000 to get the time in seconds. However, MPMediaItemPropertyPlaybackDuration is the amount of time that the track has been playing, regardless of the actual duration of the song. If you wanted to find out the length of the track in seconds, then you would need to access the CMItemRatingTrackProperties of your track. Accessing CMItemRatingTrackProperties is done by calling CMItemPropertyCopyValueWithLabelDescription(MediaPropertyType, label, description). There is no way to ask for the duration of a track in the media library in MPMediaItemPropertyPlaybackDuration. This is because the MPMediaItemPropertyPlaybackDuration is used to measure the total time a track has played, not just the actual time that the song has been playing. require 'rails_helper' RSpec.describe 'Rails 6 is a rails', :if => RUBY_ENGINE == 'jruby' do describe 'using a database' do it 'works' do stub_const('Rails', Rails.application.class.name) expect(Rails.application.kind_of?(Rails)).to be true end end describe 'global variables' do it 'are available' do expect(Rails.application).to be_kind_of(Rails)
